... MULTIGUARD AND MULTISTAN – IN DIFFERENT SHAPES AND ANY COLOUR OF CUSTOMERS CHOICE

It can be attached to the deck quickly and securely using a proven 180-degree fastener. Titanium at the base of the stanchions provides 100-percent guarantee against corrosion. At the same time, it's very simple to install and can be used in many applications.

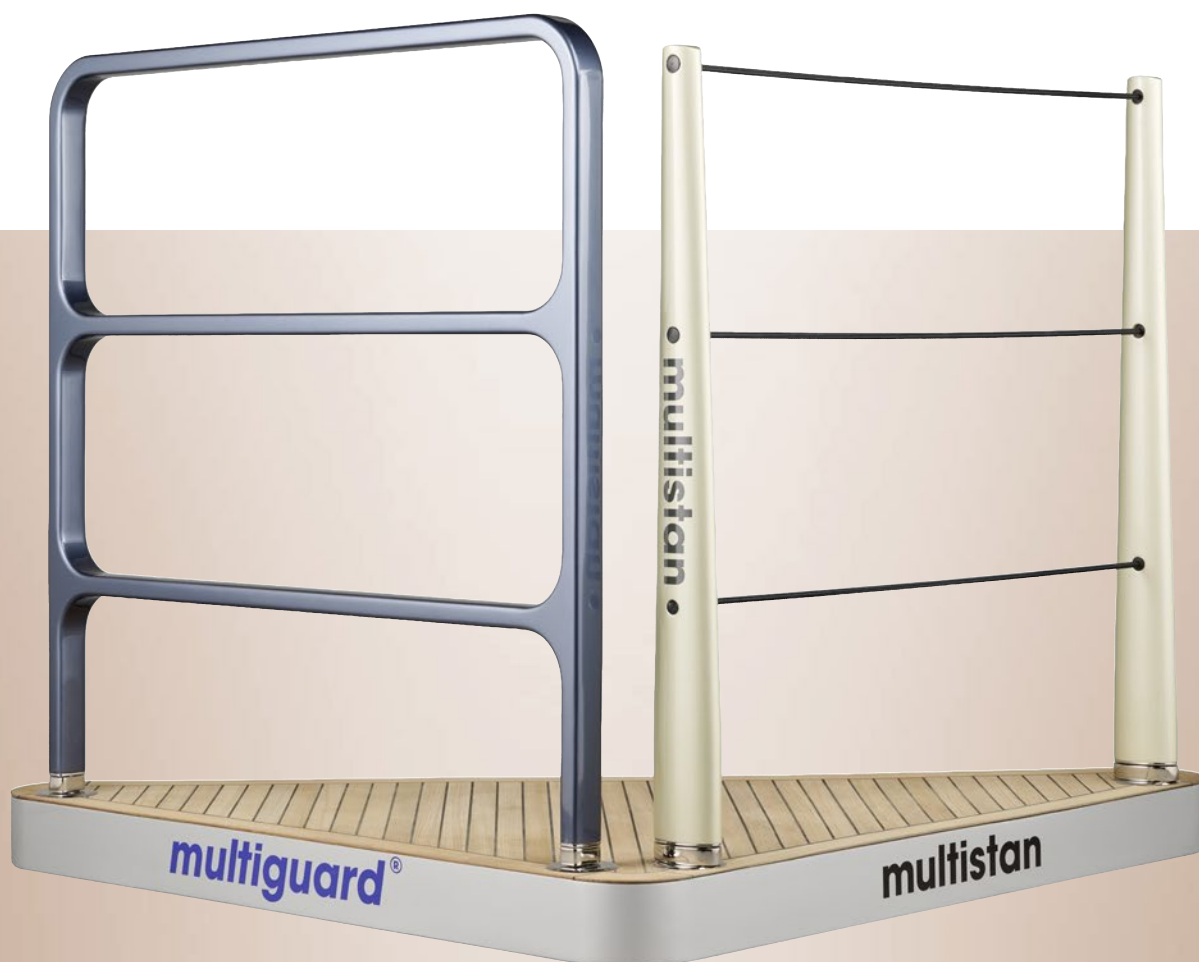

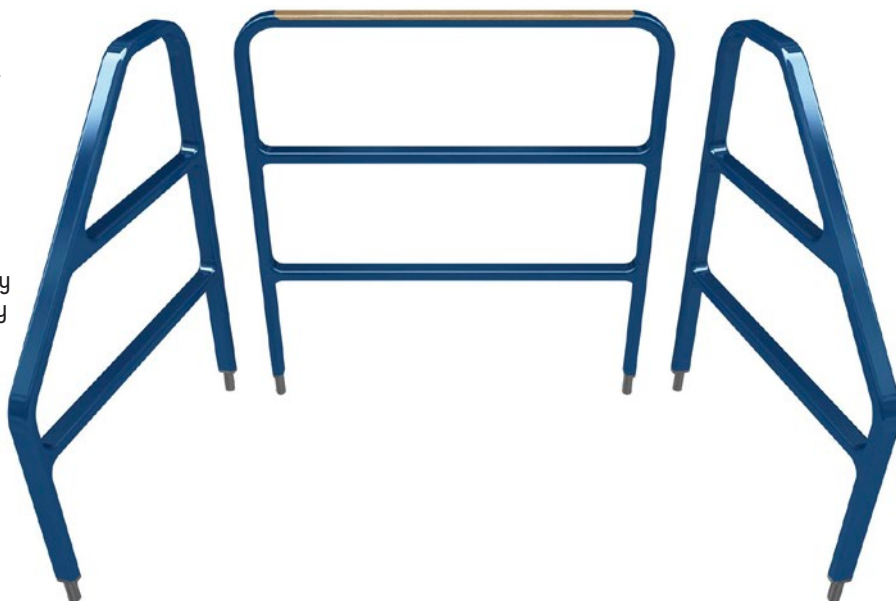

Despite its low weight the multiguard system can withstand a lateral pressure of up to 100 kilos and has been DNV certified. The system is available in a free choice of colours with personalised advice and world-wide service.

... MULTIPLEX CARBON FIBER RAILING SYSTEM REDEFINING STRENGTH, ELEGANCE, AND MARINE PERFORMANCE

Multiplex carefully engineered to meet the demanding standards of modern yacht applications. Crafted from high-performance carbon fiber, the system is exceptionally lightweight, making handling and installation effortless without compromising on strength or safety.

Designed with both functionality and aesthetics in mind, multiplex features a sleek, contemporary appearance that enhances the overall look of any vessel.
